

BRIDGE BUILDING AT CONSERVANCY CREEK PARK

Last year, 2005, the State of Wisconsin DNR declared the old Conservancy Park bridge unsafe. It was then boarded up, making access to the majority of Conservancy Park difficult or impossible. Due to that community need, replacing the bridge and providing good public access to Conservancy Park became a major 2006 project for the Waunakee Rotary Club- with many other community individuals and companies assisting with time, leadership, labor, equipment, and materials. Specifically:

Key Rotary Club Members:

Ray Statz	Leadership and Installation/ Qual Line Fence Corp.
Ken Ballweg	Steel and materials/ Endres Manufacturing Co.
Tom Reis & 3 yr old son	Installation/ Reis Electric
Phil Willems	Obtaining DNR Permit/ Installation Assistance
Danny Paul	Paint Completed Bridge Structure/ Danny's Painting Co.
Robert Tucker	Robert Tucker/ Project Photography

Key Non-Rotary Assistance

Al Sataz	Design, Manufacturing, Supervision/ Qual Line Fence Corp.
Tom Hadfield	Bridge removal and disposal/ TMH Masonry LLC
Phil Simon	Bridge removal and disposal/ Michael F. Simon Builders
Wally Jankowski	Concrete design, forming & pouring/ Advance Concrete Co.
Jerry Wipperfurth	Foundation excavation and preparation
Ross Kuehn	Crane Operator/ Endres Manufacturing Co.
Sam Ballweg	Crane Operator/ Endres Manufacturing Co.

Equipment & Materials

Bridge Structural Beams Endres Manufacturing Co.
Use of tools & bucket truck Qual Line Fence Corp.
Use of Crane Endres Manufacturing Co.

Items still to be completed as of August 28, 2006

Install sturdy steel deck & cover with cedar planks

Install steel handrails

Apply Finish Paint

Finish Landscaping

Ribbon Cutting
